

Olivette Life

...in the center of it all

Volume XVII, Issue 2

June 2015

www.OlivetteMO.com

MARK YOUR CALENDAR!

5th Annual Olivette Night Out

Share a wonderful evening with your neighbors, police officers, firefighters, and City Officials on June 16th at 6:30pm. Contact Sergeant Robbins 314.983.5250 for more information.

Your Input is Needed!

The architect will present the design and layout for the new Municipal Center on July 8th at 7:00pm at the Olivette Community Center, 9723 Grandview. Please come review the design and share your thoughts on the new facility!

Parties in the Park

June 26th at 6:30pm at Stacy Park (see page 6 for more details).

YOU ROCKED THE VOTE WELCOME

New Mayor, Chairman Pro-Tem, and Council Member

Mayor Ruth Springer

Elected Mayor of the City of Olivette for 2015-2016 at the April 28, 2015 City Council Meeting

Chairman Pro-tem J. Gregory Carl

Elected Chairman Pro-Tem of the City of Olivette at the April 28, 2015 City Council Meeting

Council Member Suzanne Sierra Sewell

Took the oath of office as Council Member for the City of Olivette, term ending in April 2018

CITY OF OLIVETTE

City Council

Ruth Springer, Mayor
J. Gregory Carl, Chairman Pro-tem
Maxine Weil, Council Member
Missy Waldman, Council Member
Suzanne Sierra Sewell, Council Member

Message from the Mayor

This is going to be a great year in the City of Olivette! Actually, this year will herald the beginning of change for our City.

I would like to begin by introducing "Coffee with the Mayor". This will be an opportunity for me to have small group conversations with you. At each coffee, I will have a different guest with me. Coffee with the Mayor will be held on the 4th Wednesday of every month, 8:45 AM at City Hall. Signs will be posted throughout the city reminding you several days in advance. Check the website, www.OlivetteMO.com to see who will be my guest that particular month. I understand that 8:45 AM may not be convenient for everyone, so I am planning other opportunities for conversation. These will be announced in subsequent editions of the Olivette Life.

On July 8th, the public is invited to a presentation about the new Municipal Center building you approved in August 2014. The interior planning is well underway and it's time for you to see all the proposed renderings. We want your thoughts, so please plan on attending this presentation on July 8th, 7:00 PM, at the Community Center. In September, with planning almost completed, you will all have another opportunity to see the final renderings.

All of that brings us to an event that has not happened in Olivette for over 60 years. In late October/early November we will have the groundbreaking for our new Municipal Center. We hope each of you will plan on attending. Your support and enthusiasm for this new building is what enabled the City to move forward with this long awaited and necessary project. Thank you again for the faith and trust you've placed in our First Responders and City.

I'm often asked, what will become of the current City Hall property on Olive Blvd, once the City relocates to their new building? While planning is underway for the new building, discussion and preparation are also underway to send out a Request for Proposal (RFP) to developers for the current Olive Blvd site. Olivette is such a great place to live, and there is much excitement in the development community about this site. I will keep you apprised as to when the RFP will be sent out and your opportunities for public comment. It's important for us to have conversation so misinformation is kept to a minimum and that everyone has practical expectations about potential site development.

With the excitement of a new building and the redevelopment of the old City Hall site, I anticipate there will be other interest in our community as well. As we have an opportunity to talk, please share what you'd like to see in our City. While not every development is possible, I think it's important for the Council to know what is high on your priority list.

The number of ways in which we can communicate in 2015 is staggering. As individuals we can email, text, tweet, pin, blog, Facebook, LinkedIn, post on websites, etc. The City has four primary ways in which to communicate with you; through our website, www.OlivetteMO.com, through the Olivette Life (published 4 times a year), using Code Red (for critical messaging) and now through Facebook at City of Olivette, MO. One of our goals this year is to increase the number of resident emails we have, and to use those for a more effective, timely method of communication. We will have more on how you can opt in to our email list in the coming months.

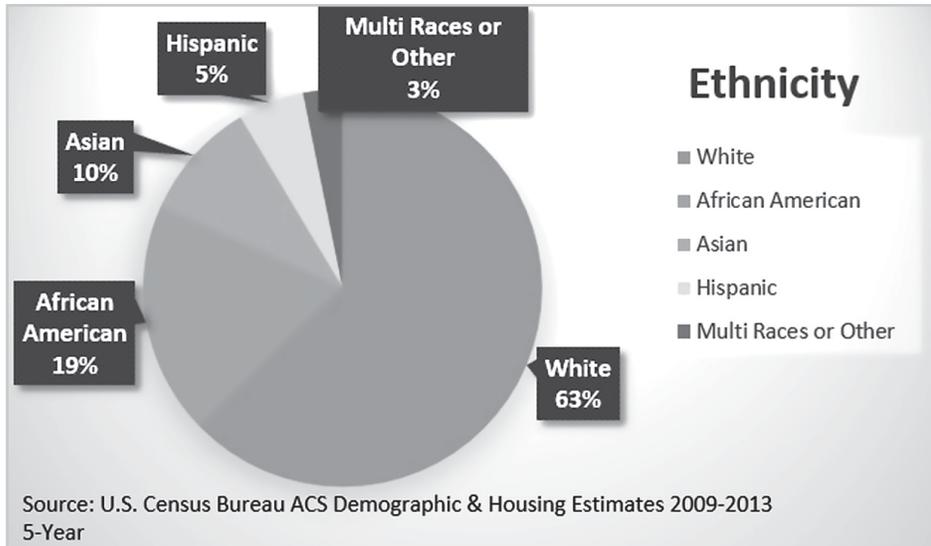

In closing, I am very excited about all the possibilities this year will bring. I ask that you get informed, stay informed and most importantly, enter the conversation. If you can't attend meetings, please email me or any other council member with your thoughts.

This year is going to be great, and we want you to be a part of it.

Ruth Springer,
Mayor

Olivette Planning 2015

Did you know Olivette is home to a diverse population?

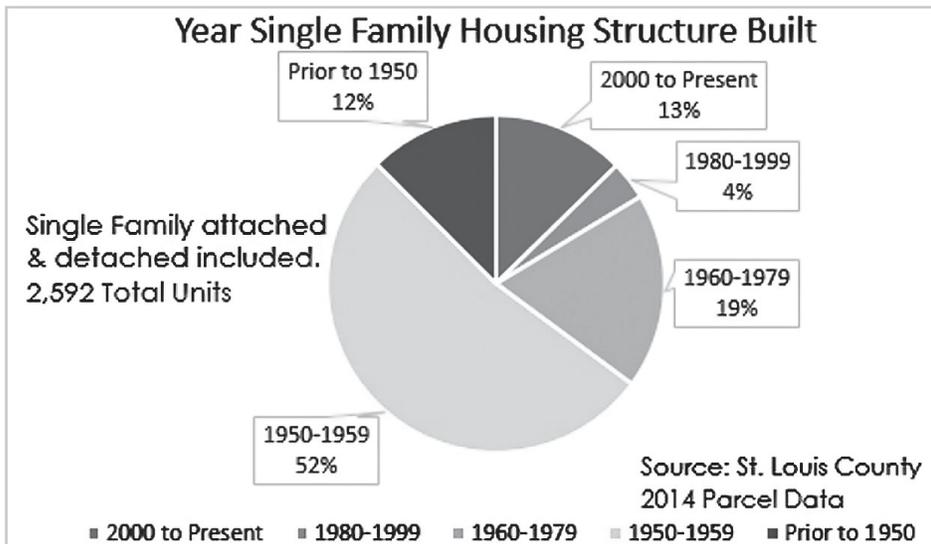

Olivette continues to become more diverse. In terms of population race characteristics, the US Census has detailed demographic data that breaks down into 7 primary race categories: White, Black or African American, American Indian and Alaska Native, Asian, Native Hawaiian or other Pacific Islander, Other, and Multiracial.

Using the data as provided by the US Census, the City of Olivette is predominately White. The 2010 Census showed that 61% of the City identified themselves as White. This, however, does reflect a drop of nearly 10% from the 2000 Census.

In comparison to the County as a whole, Olivette appears to be more diverse in every other identified race group, especially as it relates to Asians, where Olivette is three times more diverse than the County.

Did you know Olivette retains a myriad of housing options?

The City's housing stock is diverse as well as the population who fills it. Olivette's housing stock includes homes built in the early 1900s to houses built recently as last year. In retaining a diverse and exceptional housing stock, many of our households choose to renovate their homes, expand with room additions and carport conversions. Other households choose to build new. Since 2009, approximately 13 new homes are built per year. There are roughly 3,367 housing units in total, 2,592 of which are single family, detached and attached units. 60% or over 1,067 acres are utilized for residential use. Also, according to the U.S. Census Bureau, Olivette contains a 0% rental vacancy rate and a homeowner vacancy rate of 0.6%. With such a distinguished housing market, Olivette is a wonderful place to live-truly "a dynamic sense of place".

VACANCIES

Now Accepting Applications

The Olivette City Council is in the process of accepting applications to fill expiring terms and current vacancies on the various Boards, Committees, and Commissions of the City.

Following is a list of Boards & Commissions for which positions are available:

- Parks & Recreation Commission
- Board of Trustees for Retirement Plan for Salaried Employees
- Personnel Board of Appeals
- Planning and Community Design Commission
- Zoning Board of Adjustment
- Land Clearance/Housing Authority
- Economic Development Commission
- Olivette on the Go Committee

If you are interested in serving as a member of any of these Commissions, you can apply online at www.OlivetteMO.com, by going to the "I Want To" tab, and choosing "Apply for", then "Boards, Commissions, & Committees", from the drop down box.

You may also apply by submitting a cover letter and resume outlining your qualifications and experience to:

City of Olivette
ATTN: Myra Bennett, City Clerk
9473 Olive Boulevard
Olivette, Missouri 63132

or by submitting your information via e-mail at mbennett@OlivetteMO.com.

Please submit applications by June 18, 2015.

For additional information regarding the duties and responsibilities of the various Boards and Commissions, please visit our website at www.OlivetteMO.com. (On the drop down box, under the "Government" tab, click on the "Boards and Commissions".)

Police Chief's Corner

New Radio System Operational for St. Louis County Region

Do you remember the Proposition E-911 issue that was on the ballot in November 2009 for St. Louis County voters? It was an issue that proposed a new communications system for the St. Louis County area as well as surrounding regions. The intent was that first responders would be able to communicate much more effectively even if they were from different municipalities or even counties, 911 response to cell phone calls would be improved and the County warning siren system would reach areas where there were coverage gaps.

Well, the issue passed and on April 23, 2015, the Olivette Police Department, as well as the majority of other agencies in the region, began using their new radios. The new radios are digital instead of analog and provide a much needed improvement in emergency communications. Officers are able to hear crystal clear transmissions and communicate with officers from surrounding jurisdictions on specific channels. When multi-jurisdictional incidents occur, typically the number one complaint that first responders have during debriefings is the lack of ability to communicate with various personnel on the scene. This new system and the new radios will provide a communications network that will allow your first responders to provide more effective and efficient response to your calls for service.

Thank you for your support.
Richard F. Knox
Chief of Police

Ladue School District Honors Chief Rick Knox

On April 8, 2015, the Board of Education recognized Chief Knox, as well as the rest of the Olivette Police Department, for their service in keeping the schools within the Ladue School District safe. In recognition of the strong partnership between the school district and the Olivette Police, Chief Knox was presented with the Friends of Education award. Dr. Donna Jahnke, the Superintendent of Ladue Schools, noted, "He has been exceptionally supportive of Old Bonhomme School, and his presence has provided a sense of safety to our community."

In a letter to Chief Knox, Dr. Jahnke wrote, "This award is given to members of our community who have gone above and beyond what would normally be expected in order to support the Ladue School District. While we certainly count on our local law enforcement officials to help ensure the safety of our students and staff, your support and partnership is exemplary; and while our expectations may be high, you often exceed them. Whether we are working to resolve an issue with an individual student, or addressing a situation impacting a much broader community, your availability, communication, guidance and willingness to collaborate with fellow law enforcement officials in the other municipalities we serve consistently serve our Ladue Schools community well."

Chief Knox and many of the officers who serve with him are frequent visitors and familiar faces at Old Bonhomme Elementary School. Unasked, they provide a constant presence and a sense of community to the school, the students and the City of Olivette. They are on a first name basis with many of our staff members who know that help is a quick phone call away should they need it. Knowing that a familiar face will answer that call – whether in person or on the phone — is invaluable.

Olivette Police Department Hires New Officer

On April 20, 2015, the Olivette Police Department's newest officer, Jake Hoffmeister, began his law enforcement career with the City of Olivette. Officer Hoffmeister graduated first in his class from the Eastern Missouri Law Enforcement Training Academy in November 2014. This May, Officer Hoffmeister will complete his Associate's Degree in Criminal Justice from St. Charles Community College. Officer Hoffmeister was born and raised in the St. Louis area and prior to coming to Olivette, he worked on the golf staff at Whitmoor Country Club.

Chief Rick Knox and Officer Jake Hoffmeister

How Can I Protect My Children from the Sun?

Just a few serious sunburns can increase your child's risk of skin cancer later in life. Kids don't have to be at the pool, beach, or on vacation to get too much sun. Their skin needs protection from the sun's harmful ultraviolet (UV) rays whenever they're outdoors.

- Seek shade. UV rays are strongest and most harmful during midday, so it's best to plan indoor activities then. If this is not possible, seek shade under a tree, an umbrella, or a pop-up tent. Use these options to prevent sunburn, not to seek relief after it's happened.
- Cover up. When possible, long-sleeved shirts and long pants and skirts can provide protection from UV rays. Clothes made from tightly woven fabric offer the best protection. A wet T-shirt offers much less UV protection than a dry one, and darker colors may offer more protection than lighter colors. Some clothing certified under international standards comes with information on its ultraviolet protection factor.
- Get a hat. Hats that shade the face, scalp, ears, and neck are easy to use and give great protection. Baseball caps are popular among kids, but they don't protect their ears and neck. If your child chooses a cap, be sure to protect exposed areas with sunscreen.
- Wear sunglasses. They protect your child's eyes from UV rays, which can lead to cataracts later in life. Look for sunglasses that wrap around and block as close to 100% of both UVA and UVB rays as possible.
- Apply sunscreen. Use sunscreen with at least SPF 15 and UVA and UVB protection every time your child goes outside. For the best protection, apply sunscreen generously 30 minutes before going outdoors. Don't forget to protect ears, noses, lips, and the tops of feet.

Take sunscreen with you to reapply during the day, especially after your child swims or exercises. This applies to waterproof and water-resistant products as well.

Follow the directions on the package for using a sunscreen product on babies less than 6 months old. All products do not have the same ingredients; if your or your child's skin reacts badly to one product, try another one or call a doctor. Your baby's best defense against sunburn is avoiding the sun or staying in the shade.

Keep in mind, sunscreen is not meant to allow kids to spend more time in the sun than they would otherwise. Try combining sunscreen with other options to prevent UV damage.

Too Much Sun Hurts...

Turning pink?

Unprotected skin can be damaged by the sun's UV rays in as little as 15 minutes. Yet it can take up to 12 hours for skin to show the full effect of sun exposure. So, if your child's skin looks "a little pink" today, it may be burned tomorrow morning. To prevent further burning, get your child out of the sun.

Tan?

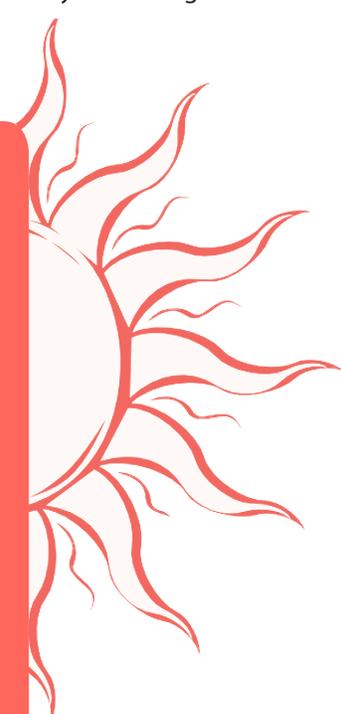

There's no other way to say it—tanned skin is damaged skin. Any change in the color of your child's skin after time outside—whether sunburn or suntan—indicates damage from UV rays.

Cool and cloudy?

Children still need protection. UV rays, not the temperature, do the damage. Clouds do not block UV rays, they filter them—and sometimes only slightly.

Oops!

Kids often get sunburned when they are outdoors unprotected for longer than expected. Remember to plan ahead, and keep sun protection handy—in your car, bag, or child's backpack.

BRITISH SOCCER CAMP!

"The #1 Youth Soccer Coaching Program"

July 20 - 24 at Stacy Park

The number one youth soccer coaching program in North America, British Soccer staff are selected and trained in the United Kingdom exclusively for youth soccer camps. All divisions include "The ABC's": individualized development of Agility, Balance & Coordination. Camp curriculum covers skill development; freestyle juggling, lift and balance instruction and technique, speed and control coaching. Camp fee includes t-shirt, take-home soccer ball, player evaluation form, action poster and online coaching resource. More curriculum specifics are available online at ChallengerSports.com. Camp meets at Stacy Park, 9750 Old Bonhomme Rd, Olivette.

Register Online by June 5th & receive a free replica jersey

RAINSCAPES

Rain Water Harvesting

Rain barrels and cisterns collect and store a portion of the rainwater from your roof. The most common type of rainwater collection system used by homeowners is a rain barrel.

Rain barrels come in a variety of sizes but typically as a 55-gallon container that collects roof runoff. Rain barrels can be added to any building with gutters and downspouts, and they have an outlet that can be connected to a garden hose so the rainwater can be used to water landscaping plants, lawns, and gardens. All rain barrels require an overflow port.

Cisterns are sealed tanks that can be located above ground, partially buried, or below ground. Cisterns are larger than rain barrels and they can collect water from several downspouts from one building's roof or from multiple roofs if they are large enough. Large cisterns may require a permit, so please check with the City before beginning the project.

When cisterns or rain barrels are full, the overflow should be directed to a safe location away from the building foundation. Overflow may also connect into a dry well, rain garden, or other area where the runoff can infiltrate into the ground on your property.

Rain Fact

One inch of rain falling on a 10-square-foot roof can produce about 6 gallons of stormwater runoff. Roof downspouts typically direct the roof runoff directly onto hard surfaces such as driveways, streets, and sidewalks that prevent the water from soaking into the ground.

By collecting your roof runoff in rain barrels or cisterns, you can reduce stormwater runoff from your property. Stormwater runoff is reduced, because you are collecting the stormwater and allowing it to soak into the ground when you use it for irrigation. When you use the rainwater to water your gardens and landscaping, you also use less potable (tap) water for this purpose, which can lower your water bills. Since rain barrels and cisterns collect rainwater for use on site, they can reduce the harmful effects to streams caused by large and rapid stormwater runoff flows.

Please contact the Public Works Department at 314.993.0252 for more information

SWIMMING POOLS

Maintenance Guidelines

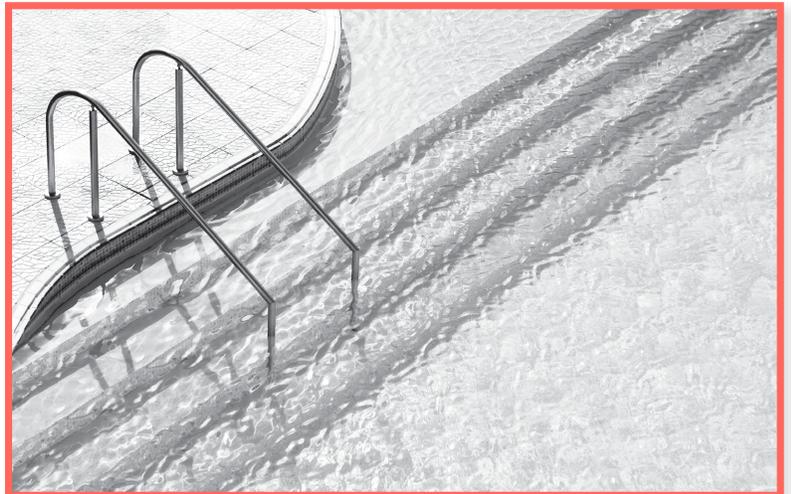

Filter Backwash Water Guidelines

- Backwashing is defined as the rinsing and/or cleaning of cartridge or sand filters. Filter backwashing produces water that contains pollutants such as chlorine and sediment.
- Filter backwash should be discharged to the sanitary sewer system or it may be discharged onto the pool owner's property as long as it can be absorbed into the ground.
- Filter backwash water may not be discharged off site to streets or the storm system.
- Do not allow filter backwash water to flow onto a neighboring property or street.

Guidelines For Draining Swimming Pools

Draining swimming pools usually involves a large volume of water with chlorine levels that can impact aquatic life in local streams. Acceptable procedures for emptying a pool are as follows:

- A pool may be emptied by discharging to the storm water system if the chlorine content is ≤ 1 part per million and free of other chemicals.
- Chlorine levels can be dissipated to acceptable levels in several days by no longer adding chlorine to the pool.
- The pH level of the water must be tested prior to discharge and must fall within a range of 5.5 – 11.5.
- The water must not be cloudy or discolored and must be free of algae and contaminants.
- Pool water may be drained on the owner's property, providing that it goes to a drainage channel, or along the curb line gutter of a paved street.
- The water must be monitored to ensure that it does not cause any erosion of the drainage channels.
- Discharges of pool water containing pollutants such as chlorine, sediment, or organic debris must be drained to the sanitary sewers.

PUBLIC RIGHT OF WAY

Planting Requirements

What is the Roadway Right of Way?

The Roadway Right-of-Way (ROW) is the dedicated area in which public improvements may be placed. It includes public streets and sidewalks, the grassy area that lies between a street and a sidewalk and public utility lines. The Right-of-Way is owned by the City and may extend several feet beyond the street or sidewalk onto unpaved areas. The right of way begins where a private property ends. Residents can refer to their property survey to locate where the right-of-way begins.

Who maintains the City right-of-way?

City crews maintain the trees that are within the right-of-way, but adjacent property owners are responsible for making sure the grass is mowed and landscaping is maintained. Adjacent property owners are responsible for making sure that the right-of-way stays clear of debris and that no shrubs or planted materials interfere with pedestrian or vehicular traffic.

Can I plant anything within the right-of-way?

Generally, when you plant trees, shrubs, and hedges, you must do so on your property; however, some special planting of trees in the right of way is authorized by permit. The permit allows the City to insure certain arbor cultural specifications and standards of practice are adhered to. Trees can beautify, add privacy, offer protection from the sun and wind and act as sound barrier; but care must be taken to insure they do not obstruct a driver's vision or traffic signs, interfere with a pedestrian's use of sidewalk, up-heave sidewalk or driveway aprons, or cause unusual or unnecessary maintenance problems. The permit is obtained from the Public Services Department and any questions should be directed to the Public Works Division by calling 993-0252. Residents who plant trees within the right of way without a permit may be required to relocate the planting. There is no fee for this permit.

Can utilities interfere with right-of-way plantings?

Yes, underground and overhead utilities can make planting trees especially difficult. Overhead utilities may prevent you from planting a tree, or it may mean that you can only plant a small ornamental variety. Depending on the type of underground utility, there may be a risk that tree roots would become entangled with buried cable, water or natural gas lines. There is particular concern that high winds that occur during storms may damage trees, which could then damage utility services located above or below ground.
